PROFILE

Passionate Android developer with hands-on experience building intuitive mobile apps using Kotlin and Jetpack Compose, with a strong foundation in software development backed by years of exploration across Android and web technologies. Also an international esports competitor, bringing a strategic mindset, teamwork, and composure under pressure.

PROJECTS

Compose Weather App   Feb. 2025 - Present
Android app displaying current weather and forecasts for different locations.

Compose Currency Converter App   Oct. 2023 - Apr. 2024
Responsive Android app that displays exchange rates, historical charts, and personalized currency watchlists.

Mayhem in Monsterland - web game   Apr. 2022 - Jun. 2022
Solo-built browser clone of the classic Commodore 64 platformer using TypeScript and custom game logic.

TicTacToe & Clock App (Java + XML)   2022
Early Android apps created at the start of my programming journey, built using traditional Views and Java.
